Professional Summary

Experienced Blockchain Developer with a robust background in designing and deploying decentralized applications and infrastructures, particularly on the Ethereum platform. Skilled in developing smart contracts using Solidity and building DApps that interact seamlessly with blockchain networks. Passionate about leveraging blockchain technology to create transparent, efficient, and secure systems.

Professional Experience

Senior Blockchain Developer
CryptoTech Solutions, Cancún
October 2018 - Present

Led the design and deployment of a decentralized finance (DeFi) platform which grew to handle transactions worth over \$200 million annually.

Developed and implemented a series of successful smart contracts for various applications, including supply chain management and digital identity verification, increasing client operational efficiency by 40%.

Coordinated with UX/UI designers to enhance application interfaces, significantly improving usability and user satisfaction.

Blockchain Engineer
Innovative Blockchain Startups, Cancún
July 2016 - September 2018

Contributed to the development of a blockchain-based voting system that increased transparency and security for municipal elections.

Assisted in integrating blockchain solutions with traditional banking systems to provide a blockchain-backed payment infrastructure.

Actively participated in blockchain workshops and conferences to stay updated with the latest technologies and best practices.

Education

Master of Science in Computer Science
Universidad Tecnológica de Cancún
2014 - 2016

Bachelor of Science in Software Engineering
Universidad del Caribe
2010 - 2014

Certifications

Certified Ethereum Developer

IBM Blockchain Foundation Developer

Technical Skills

Expert in Ethereum and Solidity smart contract development

Proficient in blockchain principles and technology, including consensus algorithms and cryptographic protocols

Skilled in full-stack development frameworks and technologies, including Node.js, React, and MongoDB

Experienced with blockchain development tools such as Truffle, Ganache, and Remix

Knowledgeable in using version control systems like Git

Languages

Spanish (Native)

English (Fluent)
