### Professional Summary

Skilled DevOps Engineer with over 6 years of experience in automating and optimizing mission-critical deployments over large infrastructure. Proficient with Docker, Kubernetes, and Jenkins for continuous integration and continuous deployment (CI/CD) processes. Aiming to leverage my expertise in script automation, system scalability, and cloud technologies to enhance operational efficiencies at a progressive technology firm.

### Professional Experience

#### Senior DevOps Engineer

InnovaTech Solutions, San Luis Potosí

May 2018 - Present

Led the transition from legacy systems to a fully automated CI/CD pipeline that decreased deployment times by 50% and reduced downtime by 30%.

Designed and implemented scalable, high-availability infrastructure solutions using Kubernetes, resulting in enhanced system resilience and load handling.

Developed Python and Bash scripts to automate routine tasks, which increased team productivity and focus on critical developments.

#### DevOps Engineer

TechAdvance, San Luis Potosí

March 2015 - April 2018

Managed daily operations of cloud environments using AWS, including EC2, S3, and RDS, optimizing costs and performance.

Implemented Docker containers for all development, testing, and production environments, which standardized and simplified configurations.

Conducted system troubleshooting and problem-solving across platform and application domains, significantly reducing system failures.

### Education

#### Master of Science in Computer Science

Universidad Autónoma de San Luis Potosí

2013 - 2015

#### Bachelor of Science in Software Engineering

Instituto Tecnológico de San Luis Potosí

2009 - 2013

### Certifications

Certified Kubernetes Administrator (CKA)

AWS Certified Solutions Architect

Jenkins Engineer Certified

Technical Skills

Proficient in using Jenkins, Git, Docker, Kubernetes for CI/CD pipelines

Strong command over AWS, Azure, and GCP cloud platforms

Experienced in infrastructure as code with Terraform and Ansible

Proficient in scripting languages including Python, Bash, and PowerShell

Languages

Spanish (Native)

English (Fluent)
