Professional Summary

Results-driven Software Tester with over 4 years of experience in manual and automated testing environments, specializing in functional, regression, and usability testing for web and mobile applications. Proven track record of identifying and resolving inefficiencies, enhancing software quality, and meeting client expectations through rigorous testing and quality assurance practices.

Professional Experience

Software Tester
NextWave Technologies, Zapopan
June 2019 - Present

Executed detailed test cases and managed automated test scripts to validate features in high-traffic web applications.

Utilized automation tools like Selenium and Appium to streamline testing processes, reducing manual testing workload by 40%.

Collaborated with cross-functional teams to integrate user-centered testing approaches, improving product usability and customer satisfaction metrics.

QA Analyst
AppInnovate Startups, Zapopan
July 2015 - May 2019

Developed and maintained comprehensive test documentation, including test plans, test cases, and defect reports, using TestRail and Confluence.

Performed extensive manual testing on mobile applications, identifying critical bugs and interfacing with developers to facilitate quick resolutions.

Assisted in the implementation of continuous integration practices using Jenkins, enhancing development cycles and reducing time to deployment.

Education

Bachelor of Science in Software Engineering
Instituto Tecnológico de Zapopan
2011 - 2015
